EDUCATION

University of Nebraska at Omaha | Peter Kiewit Institute Bachelor of Science in Comp Sci, AI, Cybersec Triple Major

Projected 2027 | Planned 2028

- Walter Scott, Jr. Scholarship Recipient
- Regents Scholarship Recipient
- Cumulative GPA: 3.73

Coursework: Next-Gen Software Development, Computer Science Principles AP, Adv. Computer Science (H), Computer Science A AP, 2D Game Programming, Full Stack App Development, Intro to CS II, Mathematical Foundations of CS, Intro to Information Security, Low Level Programming, Organizations Applications and Technology

SKILLS & TECHNICAL TOOLS

Languages: Python, Swift, JavaScript, HTML, CSS, Java

Technologies: MySQL, PostgreSQL, GitHub, XAMPP, Apache, vSphere, Office 365

Skills: Design Thinking, Communication, Problem-Solving

EXPERIENCE

Computer Vision for Damage Detection - LANL Research Project

June 2025 – August 2025

Los Alamos National Laboratory | University of Nebraska at Omaha

- Developed Flask web application with real-time damage confirmation interface, streamlining manual verification process for nuclear safety compliance requirements
- Trained model and shared code using open source and offline softwares
- Implemented YOLO object detection model achieving damage classification on 1,000+ labeled nuclear waste barrel images using Python, OpenCV, and Label Studio annotation pipeline
- Designed PostgreSQL database schema with automated image routing logic, directing damage-positive classifications to priority review queues for quality assurance workflows

Lead IT Consultant | CBA Operations

January 2025 -Present

University of Nebraska at Omaha

- Providing frontline technical support to students and faculty, addressing hardware and software issues.
- Fixing physical hardware through problem solving and computer knowledge
- Designing and conducting training sessions for student workers, ensuring they are well-equipped to handle various IT support tasks with a focus on classrooms and teaching-related technologies.
- Supervising and guide a team of student workers within the CBA Operations

College of Information Science and Technology Grader

January 2025- Present

University of Nebraska at Omaha

- Evaluating student programming assignments using standardized rubrics, providing technical feedback
- Efficiently managed high-volume assessment workflows while meeting strict deadlines and maintaining quality standards

Cybersecurity Research Intern

June 2022- July 2022

University of Nebraska Omaha

- Researched internet patterns in students K-6 and cybersecurity vulnerabilities on children's websites
- Created an informative presentation tailored towards children's that highlights the dangers of the internet
