EDUCATION AND AWARDS

University of Nebraska Omaha

Bachelor of Science in Comp Sci and AI Double Major

Omaha, NE

Aug. 2024 – Projected 2028

Walter Scott Jr Scholar Recipient

4 Year Cohort focused on fostering leadership and providing impact in the community

Omaha, NE

Received Aug. 2024

EXPERIENCE

Computer Vision for Damage Detection

May. 2025 – August 2025

Los Alamos National Laboratory x UNO

Omaha, NE

- * Developed a **Flask** web application with a real-time damage confirmation interface, streamlining the manual verification process for nuclear safety compliance requirements
- * Designed and implemented a **PostgreSQL** database schema with automated image routing logic, directing damage-positive classifications to priority review queues for quality assurance workflows
- * Built **front-end** review interface using **HTML** and **CSS**, enabling efficient manual confirmation of flagged nuclear waste barrel images
- * Researched and explored **YOLO object detection models** to understand classification pipelines for potential integration with the damage detection workflow

Lead IT Consultant

January 2025 – Present

University of Nebraska Omaha

Omaha, NE

- * Providing frontline technical support to students and faculty, addressing hardware and software issues.
- * Fixing physical hardware through problem solving and computer knowledge.
- * **Designing** and conducting training sessions for student workers, ensuring they are well-equipped to handle various IT support tasks with a focus on classrooms and teaching-related technologies.
- * **Supervising** and **guiding** a team of student workers within the CBA Operations

Python Grader

January 2025 – Present

University of Nebraska Omaha

Omaha, NE

- * Evaluating student programming assignments using standardized rubrics, providing technical feedback
- * Efficiently managed high-volume assessment workflows while meeting strict deadlines and maintaining quality standards

Cybersecurity Research Intern

June 2022 – July 2022

University of Nebraska Omaha

Omaha, NE

- * **Researched** internet patterns in students K-6 and cybersecurity vulnerabilities on children's websites
- * Created an informative **poster** and **presented** to project leads over research results

PROJECTS

Inventory Management System | *React, Supabase, Vite, PostgreSQL*

August 2025 – Present

- * Developed a **full-stack** inventory management system for a medical supply nonprofit, replacing manual spreadsheet workflows and enabling real-time tracking of **2,000+ units** of medical inventory
- * Built a responsive **React 18 + TypeScript** dashboard with **Vite**, featuring searchable/filterable tables, **CRUD** operations, and detail modals for streamlined inventory workflows
- * Implemented role-based authentication using **Supabase** with session persistence and protected routes via **React Router v7**
- * Designed a mobile-friendly UI with **Tailwind CSS v4** and **shadcn/ui**, reducing volunteer data entry time and improving inventory accuracy

TECHNICAL SKILLS

Languages: Python, SQL (Postgres), JavaScript, HTML/CSS, Swift

Frameworks and Tools: React, Node.js, Flask, Supabase, ShadCN-UI, Express
